PipeWrap® BT
Hot Applied Anti-Corrosive Bituminous Tape

Description

PipeWrap® BT is a hot applied bituminous tape for corrosion protection conforming to IS: 10221, Appendix B. Specially formulated corrosion resistant bitumen compound provides high softening point, high penetration and high resistance to ageing. PipeWrap® BT comprises of high tensile strength thermo-fusible HMHDPE film on both the sides.

2 mm PipeWrap® BT is five layer without fiber glass inner core, whereas, 3 / 4 mm thick PipeWrap® BT is seven layer tape with two inner cores; top core is of tough 45 gsm fiber glass and the bottom core is of 15 micron high tensile strength HMHDPE.

Application

- Coating material for drinking water pipelines, fire fighting pipelines, raw water pipelines in thermal plants etc.
- Applied on buried and immersed pipes, fittings and appurtenances to protect them from high corrosive environment

Advantages

- Coating material for drinking water pipelines, fire fighting pipelines, raw water pipelines in thermal plants etc.
- Applied on buried and immersed pipes, fittings and appurtenances to protect them from high corrosive environment

Application Methodology

- **Surface Preparation**
  - Remove dust, flakes, oil, grease or other loose foreign particles by blasting, wire brush or compressed air.
  - Leave 200 mm from pipe ends for welding joints. Coat and wrap such left over part of pipe at site after welding and hydro testing.

- **Application of Material**
  - Apply ShaliPrime PW BT on cleaned surface at 0.30 L / m² to get DFT of 30 microns.
  - Allow the primed surface to touch dry, which may take 5 - 15 minutes.
  - Remove PE film and show the flame of butane gas torch on to the surfaces till it becomes glossy-smooth.
- Coat **PipeWrap® BT** on the primed surface. Provide overlap of 25 mm between two adjoining layers. Wrap spirally and apply sufficient tension to ensure good adhesion and avoid pockets and bridging to meet holiday detection requirement. Tape joint shall face downward on outside of lap joint.
- Complete necessary welding and testing of the joint before coating.
- Recommend to apply at the time of pipe erection and lowering inside trenches to avoid any damage.

**Health & Safety**
- Avoid contact with skin / eyes and avoid swallowing.
- Ensure adequate ventilation and avoid inhalation of vapour.
- Wear suitable protective clothing, gloves and eye protection.
- In case of skin contact, rinse with plenty of clean water, then cleanse with soap and water. Do not use solvent to clean the contacted area.
- In case of eye contact, wash with plenty of clean water and seek medical advice.
- If swallowed, seek medical attention immediately. Do not induce vomiting.

**Packing**
Available in 2 mm, 3 mm and 4 mm thickness with width of 250 mm, 500 mm and 1000 mm. Each roll of 2 mm tape consists of 20 Mtr length, whereas each of roll of 3 mm & 4 mm tape consists of 10 Mtr length.

**Storage**
Keep under shed, away from heat. Do not stack more than three rolls in one column.

---

**Product Range**
- Waterproofing and Insulation
- Road Surfacing
- Sealants and Additives
- Pipeline Coating
- Protective / Anti-Corrosive Coating
- Epoxy Flooring
- Grouts / Admixtures
- RestoFix - Repair / Rehabilitation
- Other Construction Chemicals
