ShaliKote® AC
High Performance Acrylic Anti Carbonation Protective Coating

Description

ShaliKote® AC (Formerly known as Architectural Seal) is an acrylate based non-yellowing Anti-carbonation protective coating for concrete and masonry surface. It is available in selective colours and will not show yellowing tendency on exposure to sunlight when applied to the concrete. It forms an inert, impervious film that is resistant to alkali from fresh concrete as well as acid, salt and many construction stains. It is ideally suitable for exterior application to protect the structure from Carbonation, chloride ions, Salts, Weathering and Industrial corrosive climate.

The complete system consists of ShaliPrime AC as a primer and ShaliKote® AC as a Top coat. ShaliPrime AC is Silane Siloxane (solvent) based penetrative & reactive sealer, which chemically reacts with the substrate & forms a effective barrier to the dissolved ions, salts etc in the water. The total system offers a long lasting anti-carbonation and corrosion protection for concrete structures.

* Depending upon surface condition.

Application

- Old & new Concrete structures.
- Unglazed bricks and clay tiles.
- Terrazzo floors and walls.
- Exterior masonry surface.
- Bridges, Dams, Flyovers, Elevated MRTS and Marine Structures.
- Chimneys, cooling towers, Silos, Industrial buildings & power house.
Advantages

- Excellent barrier to carbon dioxide, chloride ions, sulphates, oxygen and water.
- Selected range of decorative colours.
- Highly durable in all climate conditions.
-Seals out dirt and other staining materials.
- Excellent resistance to UV rays.
- Permeable to water vapour – Breathable.

Application Methodology

- Surface should be dry, structurally sound, free from grease, oil, dirt and other contaminations.
- Remove any curing compound or releasing agents prior to coating.
- Use compressed air or grit blasting to remove dust and other loose particles.
- Any blow holes, honey combs on the surface should be repaired & made even.
- Ensure that the surface is dry prior to application.
- **ShaliKote® AC** is a single pack system. Mix well before application, to ensure that there is no sedimentation.
- Low pressure, airless sprayer is the preferred method of application. But a brush or roller may also be used for coating. Material should be applied to assure uniform coverage.
- Apply ShaliPrime Acrylate @ 4 -5 m² / L.
- Allow it to dry for at-least 5 hrs.
- Apply **ShaliKote® AC** on the primed surface as per the coverage
- Allow it to dry for 4 – 5 hrs before re-coating of the second coat.

Cleaning & Maintenance

Clean tools and equipment with Xylene or Toluene before the material hardens

Health & Safety

- Use mask, nose cover and hand gloves during application.
- Clean hands with soap water after application.
- Ensure adequate ventilation and avoid inhalation of vapours as some people are sensitive to resins and solvents.
- Avoid contact with skin / eyes. In case of unlikely contact with eyes, rinse immediately with plenty of clean water, then cleanse with soap and lukewarm water and seek medical advice. Do not use solvent to clean the contacted area.
- Prevent swallowing. In case of unlikely swallowing, seek medical attention immediately. Do not induce vomiting

Packaging

Available in 20 L pack.

Storage

Keep in cool and dry place, under shed, away from heat.

Shelf Life

12 months in original unopened sealed condition
Made in India

Product Range
- Waterproofing & Insulation
- Road Surfacing
- Sealants & Adhesives
- Pipeline Coatings
- Protective/Anti-Corrosion Coatings
- Epoxy and Flooring
- Grouts and Admixtures (GARA)
- RestoFix - Repair/Rehabilitation
- Other Construction Chemicals
