ShaliPrime SSC
Solvent Based Coal Tar Primer For Runways / Other Concrete Surfaces

Description

ShaliPrime SSC (earlier known as ShaliJet Primer) is a solvent based Coal Tar primer that seals pores in surfaces such as concrete and improves adhesion of Coal Tar materials to substrate.

Characteristics

Application

ShaliPrime SSC is applied in canal lining gaps and concrete floor joints prior to pouring of the ShaliJet Sealing Compound for bonding of the Coal Tar Sealant to the gaps.

Advantages

- Excellent bonding of Coal Tar Sealant and concrete surface.
- Easy to Apply
- Economical and cost effective.

Application Methodology

- Ensure that concrete is adequately cured and is at least eight days old.
- Clean concrete surfaces free from dust, sand and all foreign particles by hot air / broom.
- Stir ShaliPrime SSC thoroughly to ensure to make it homogeneous.
- Apply on dry substrate by means of brush, roller or spray at the rate of 0.3 L/m².
- Allow it to dry for 24 hrs.
- Do not apply when temperature is less than 5 °C or during foggy conditions.

Health & Safety

- Use goggles, masks and hand gloves during application
- Clean hands with warm soap water after application

Packing

Available in 20 L and 200 L drum.

Storage

Keep in cool and dry place, under shed away, from heat.
