**ShaliProtek® 2AC PU TC**

2K Isocyanate Cured Aliphatic Acrylic PU UV Resistant Finish Coat

---

**Description**

**ShaliProtek® 2AC PU TC** is two components liquid aliphatic Acrylic Polyurethane based UV resistant gloss coating.

**ShaliProtek® 2AC PU TC** gives tough, flexible and solvent and mild chemical resistant coating.

**ShaliProtek® 2AC PU TC** is available in transparent as well as various colours.

---

**Characteristics – Physical**

---

**Application**

- Protection of heritage structure and statue.
- Extensive use in coastal and chemical environment.
- Power / Oil / Gas Plants / Offshore structures.
- Petrochemical / Pharmaceutical / Chemical Plants.
- Cement / Steel plants,
- Infrastructure projects.
- Marine structures.
- Rail coach and chemical wagon exteriors.

---

**Advantages**

- Resistant to
  - UV and weather.
  - High Impact and abrasion.
  - Industrial corrosive environment
- Better adhesion and flexibility.
- Direct to metal application.
Application Methodology

➢ Surface Preparation

- Concrete Surface
  - Prepare the surface by mechanical grinding or other suitable method.
  - Remove dust, flakes, oil, grease or other loose foreign particles by sand blasting, iron brush or compressed air. Remove old painting using surface grinder.
  - Remove old painting using surface grinder.
  - For best bond, concrete surface must be slightly textured.
  - Ensure that concrete must be cured at least 28 days and moisture content is below 5%.

- Metal Surface
  - Remove all loose mill scale, oil, grease by wire brush and solvent
  - Blast the surface to Sa 2 or 2.5 depending on the severity of the condition

➢ Material Preparation

- Stir entire Component A thoroughly by using speed drill mixer with a spiral type blade at the bottom of stirrer rod. The speed may be 300 - 400 rpm till homogeneous mix is obtained.
- Add entire Component B in Component A. Both Component A & B comes in factory pre-weighed quantity in the ratios of 9 : 1 by volume.
- After stirring, wait for 5 minutes to ensure escape of entrapped air.

➢ Application of Material

- Prime the surface – in case of concrete with ShaliPrime PUM and in case of metal (optional) with ShaliPrime 2E.
- Allow it to dry for 6 – 8 hrs till it is touch dry.
- Apply ShaliProtek® 2AC PU TC by brush / roller / spray to the primed surface.

Cleaning

- Clean all tools immediately after use with STP Thinner. Do not allow material to harden.

Health & Safety

- Avoid contact with skin / eyes, and avoid swallowing.
- Ensure adequate ventilation and avoid inhalation of vapour.
- Wear suitable protective clothing, gloves and eye protection.
- In case of skin contact, rinse with plenty of clean water, then cleanse with soap and water. Do not use solvent to clean the contacted area.
- In case of eye contact, wash with plenty of clean water and seek medical advice.
- If swallowed, seek medical attention immediately. Do not induce vomiting.

Packing

Available in 4 L and 20 L pack.

Storage

Store in a cool dry place, under shed, away from heat.
Shelf Life
12 months in original unopened sealed conditions.
