ShaliUrethane® PU TC 2K
2K Aliphatic Polyurethane UV Resistant Top Coat

Description

ShaliUrethane® PU TC 2K is two component, liquid aliphatic polyurethane based UV and weather resistant coating. It is ideal protective coating for exposed surfaces as it provides excellent weather resistance and stability. ShaliUrethane® PU TC 2K films are hard, tough but flexible and display good solvent and gasoline resistance. ShaliUrethane® PU TC 2K is available in various colours.

Application

- On shore and off shore industries.
- Power Plants.
- Petrochemical and Pharmaceutical complexes.
- Cement and steel plants, Transportation Industries.
- Infrastructure projects.
- Chemical plants.
- Protection of heritage structure and statue.

Advantages

- UV and weather resistance.
- Better adhesion and flexibility.
- Mild Chemical resistance.

Application Methodology

- **Surface Preparation**
  - **Concrete Surface**
    - Prepare the surface by mechanical grinding or other suitable method.
    - Remove dust, flakes, oil, grease or other loose foreign particles by sand blasting, iron brush or compressed air. Remove old painting using surface grinder.
    - Remove old painting using surface grinder.
- For best bond, concrete surface must be slightly textured.
- Allow it to dry before priming.
- Ensure that concrete must be cured at least 28 days and moisture content is below 5%.

**Metal Surface**
- Remove all loose mill scale, oil, grease by wire brush and solvent.
- Blast the surface to Sa 2 or 2.5 depending on the severity of the condition.
- Apply ShaliPrime ERO or ShaliPrime Zn Ph.
- Allow the primer to dry from solvent.

➢ **Material Preparation**
- Mix ShaliUrethane® PU TC 2K component A (Resin) thoroughly by using speed drill mixer with a spiral type blade at the bottom of stirrer rod. The speed may be 350 - 400 rpm till homogeneous mix is obtained. Then add component B (Hardener) slowly, mix with a slow speed stirrer ensuring complete dispersion.
- After stirring, wait for the product to settle in order to let entrapped air escape.

➢ **Application of Material**
- Prime the surface and allow it to dry for 6 – 8 hrs till it is touch dry and free from solvent.
- Apply ShaliUrethane® PU TC 2K by brush / roller / spray on primed surface.

**Cleaning**
- Clean all tools immediately after use with xylene. Do not allow material to harden.

**Health & Safety**
- The product should not come in contact with the skin and eyes, or be swallowed.
- Ensure adequate ventilation and avoid inhalation of vapours as some people are sensitive to resins, hardeners and solvents.
- Wear suitable protective clothing, gloves and eye protection.
- In case of contact with skin, rinse with plenty of clean water, then cleanse with soap and water. Do not use solvent to clean the contacted area.
- In case of contact with eyes, rinse immediately with plenty of clean water and seek medical advice.
- If swallowed seek medical attention immediately - **do not** induce vomiting.

**Packing**
Available in 5 & 20 L units consist of Component A and B.

**Storage**
Store in a cool dry place, under shed, away from heat.

**Shelf Life**
12 months in original unopened sealed conditions.
